The IEEE South Africa Section is a recognized voluntary association of the Engineering Council of South Africa (ECSA), and is pleased to announce our newest effort towards providing 150+ courses enabling for your continuing professional development (CPD).

The purpose of this program is to provide quality educational materials to enhance local IEEE educational and professional activities and further support the value of your IEEE Membership.

The IEEE eLearning Tutorials Program makes available high quality, *internationally* peer-reviewed, online continuing education tutorials in a variety of subject areas to IEEE Members through a new **online portal**.

Not only is the offering available online, but you can now also download your customized CPD certificates (ECSA category 1, developmental activities) upon completing a course. Opportunity to provide course feedback is also available online. And as a reminder, for every 10 hours, you'll attain one credit (category 1).

As a member of a recognized voluntary association, don't forget to claim your 1 credit (category 3)!

The IEEE South Africa Section is supportive of the ECSA CPD requirement and wishes you the best towards your CPD, from the comfort of your internet-connected computer! Please visit: http://za.ieee-elearning.org/
